AN IMPORTANT FACTOR

QUICK SHIPMENTS

WHY WE CAN MAKE THEM

WE are *manufacturers* and do not depend upon others to produce goods we sell. We can ship average orders in less time than most of our *jobber competitors* consume in trying to find out where to buy the work.

We cater to the mail order business of lumbermen, and have built up an organization specially adapted to serving this class of buyers with uniform promptness.

When in a hurry send us a trial order.

JOHN·A·GAUGER·&·CO
CHICAGO.

JOHN A. GAUGER FLOYD T. LOGAN

TO THE TRADE

IN issuing this Catalogue to the trade, we do so feeling confident you will find it the most complete book of its kind ever issued. No effort has been spared to make it attractive and our assortment as shown is wide and comprehensive, including all the staple goods in common demand, as well as a large line of specialties, which, in connection with our unequalled shipping service, afford immediate delivery of almost any staple article in the line. We shall be pleased to receive inquiry or correspondence of any character relating to the contents of this book, or the line in general, and to such, as in all things, we give our ***prompt attention.***

On all orders sent us, where patterns or designs are specified by number, we will understand that the number is taken from this book, if it appears therein, unless the order states the number is taken from some other book. When ordering from other books than ours, do not fail to state from whose catalogue the numbers are taken and the date of issue of the book.

ORDER BY NUMBER ONLY. **DO NOT CUT THIS BOOK.**

Very respectfully yours,

JOHN A. GAUGER & CO.

CHICAGO, U. S. A., April 1, 1902.

JOHN·A·GAUGER·&·CO
CHICAGO.

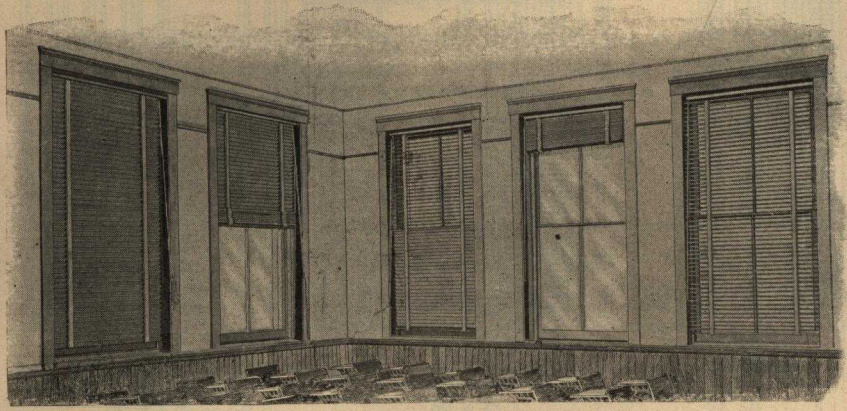
JOHN A. GAUGER & CO.'S VICTORIA VENETIAN BLINDS

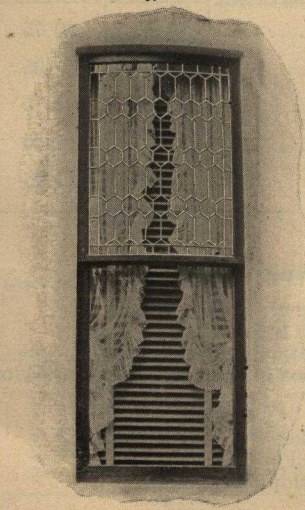
Five ways the slats can be adjusted, and still there are others.



No. 1 No. 2 No. 3 No. 4 No. 5

JOHN A. GAUGER & CO.'S VICTORIA VENETIAN BLINDS

If you want the best on earth get them.



No. 1 shows slats all closed. No. 2, Blind half drawn, upper slats closed. No. 3, lower slats closed, upper open. No. 4, Blind entirely drawn. No. 5, all slats turned to exclude the sun, and still admitting an abundance of light.

MADE WITH SLATS 2 INCHES AND ALSO 2⅜ INCHES WIDE. The former are intended for medium-sized windows in residences, etc.. The latter width costs less, makes a lighter Blind, and is intended for larger windows, such as are found in public buildings, etc. Either width is well adapted for any use.

Victoria Blinds are made of thin wood slats, hung on the best woven ladder tape; hang within window frames, between jambs or stop beads; are never swinging out into the room, "sticking fast" or "coming off the roller," and are perfectly noiseless, both in use and operation. Can be hung in old as well as new buildings by anyone.

From the Above it is seen that all the slats or any part of them can be instantly adjusted to admit light and air the full width and height of a window to exclude it from the top, bottom or any part.

Are perfectly sanitary and can be as easily kept clean as any other piece of furniture.

☞ Made only to order to fit the window.

Our Patented Method for securing our Blinds at the bottom prevents their being disturbed by the wind before an open window, and is a very great and exclusive advantage over all others.

You will save TIME and MONEY by ordering stock designs and sizes

FOR PRICES SEE NEXT PAGE

LIST PRICES OF JOHN A. GAUGER & CO.'S IMPROVED VICTORIA VENETIAN BLINDS

With a nice varnish finish, complete with best quality woven ladder tape, and including all hardware for hanging.

MADE FROM	2¾-in. Slats per sq. ft.	2-in. Slats per sq. ft.
Spruce, Whitewood, Basswood, Yellow and Norway Pine, finished natural, stained to imitate Cherry, Mahogany or Walnut, or painted in Dark colors	19 cts.	21 cts.
Painted in Light colors or Tints	21 "	23 "
Painted in Enamels	24 "	26 "
Enameled, rubbed between Coats	38 "	40 "
White Pine, Cypress, Plain Oak, Ash, Elm, Chestnut and Ordinary Maple	21 "	23 "
Plain Birch and Butternut	22 "	24 "
Quartered Oak and Sycamore	24 "	26 "
Cherry, Black Walnut, California Redwood and White Ash	30 "	32 "
Red Mahogany, Curly Birch, Birdseye and White Maple	38 "	40 "

☞No Blinds figured to contain less than fifteen square feet.

For rubbed finish, add 3 cents per sq. ft. to the above list.

Bronzed Hardware, 15 cents net per blind extra.

Basswood with natural finish will be sent if wood is not specified.

Color of tapes can be selected or left to our judgment; following are kept in stock:

Buff, Drab, Cinnamon, Green, White.

Striped Brown and Buff, Striped White and Drab.

Tape for repair work, 12 cents per yard, and cord to match 2 cents per yard.

No Blind or Transom Blind figured to contain less than 15 square feet.

To Estimate the cost of a blind, figure the exact width and height of opening to be filled; the distance between stops or between jambs (depending upon between which the blind is to be hung) must be taken for width, except when blinds are hung on face of casing or lining, when the length of slat required must be taken for width. Generally when a blind is hung on the face of casing or lining, the slats should lap an inch at each side.

It is seldem necessary to hang Victoria Blinds on the face of casing or lining, for they can be hung between the stop-beads or jambs which are as narrow as ¾ inch.

Weight—Packed for shipment and made from Basswood the blinds weigh about seven-tenth of a pound to the square foot of blind; made from Pine, Oak, etc, one pound to the square foot.

Freight—Almost invariably they can be shipped at third-class rates.

It will be found more convenient and lessen liability of errors if orders are made out upon ruled Order Blanks we will furnish.

You will save TIME and MONEY by ordering stock designs and sizes

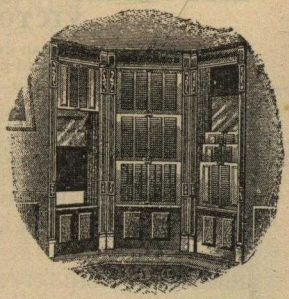
HILL'S PATENT INSIDE SLIDING BLINDS

These Blinds are usually made in three sections, the upper sections having stationary slats, and the lower section only having rolling slats. They are made in two, three, four, or more divisions, according to width of window.

The cut shows the Blinds as they are usually made, i. e., three sections and four divisions. Any arrangement of *panels* and slats can be substituted in place of all slats if desired.

All necessary hardware and fittings are furnished with the Blinds.



MEASUREMENTS

Give exact width of window between Jambs, and height from window sill to top jamb.

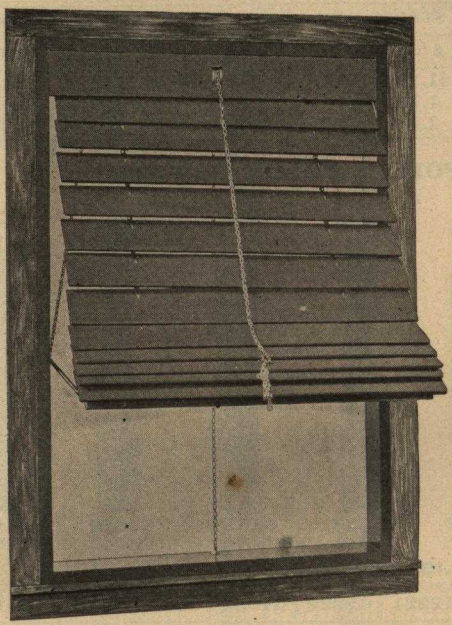
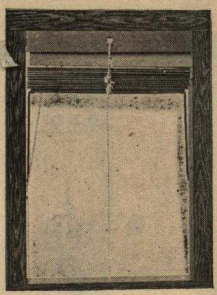
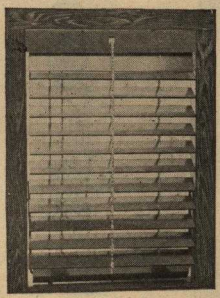
JOHN A. GAUGER'S & CO.'S AMERICAN AWNING-BLIND

The Acme of Perfection in Blind Manufacture.
A Combined Awning and Venetian made entirely of wood and metal.







Awning effect with slats partly open.

This Blind is unsurpassed for the verandas and windows of all kinds of public and private buildings and residences and is made only to order.

It hangs between the outside window frame or the slats can lap an inch or more on the face of the outside casing.

The slats are 3-16 in. thick and 2 5-8 in. wide, covered with the best oil paints, green or any desired color, and held together and tilted with small *solid link* brass chains.

When drawn upwards the iron extension arms swing the Blind outwards "awning-like" to any desired angle, making a perfect shade, and the slats can all be opened at one time to admit any degree of light and an unobstructed circulation of air—two points of vast advantage over cloth awnings. Being made entirely of wood and metal there is no occasion to take them down in winter as is generally done with awnings, saving this semi-annual expense and trouble, and they are always ready for instant use at all times of the year.

Where metal tape is desired for inside use, this blind, without the extension arms, is well adapted.

Can be let down and slats opened partly as shown above, or wide open, to admit light and air and yet shield the glass from the sun or tightly closed to darken a room and as a protection against storms.

When not in use the Awning-Blind can be drawn to top of window and securely fastened, occupying but a small space.

We manufacture these Newels in large quantities, and can furnish them promptly from stock. Best material used and hand smoothed.

Platform or Angle Newel is made with loose drop so that post can be cut off at bottom to any desired length.

All wood carvings hand carved. Each Newel wrapped in heavy paper.

V. **How to Take Care of Your Floor Thereafter**—In order to properly treat and keep in perfect condition a newly finished floor before a new coat of wax is applied, which should be done about every two or three months, thoroughly cleanse the surface with our specially prepared *Lightning Floor Restorer*, which removes dirt, stains and spots of all kinds from the finish.

VI. **How to Refinish an Old Floor**—When a floor becomes badly worn and dirty, remove all varnish, wax and shellac by using our *Lightning Varnish Remover*, which can be applied with a brush, which will instantly dissolve the finish, and same can be removed by the use of a scraper or steel wool. If there is a heavy coating on the floor it may require two applications of the Remover. When varnish, etc., is thoroughly removed wipe the floor with a rag saturated with benzine. The floor is then ready to be refinished, as desired, the same as new.

Our Mantel Department

ON the following pages we show many modern designs of Hardwood Mantels of the best workmanship, and at lower prices than heretofore offered. We furnish these Mantels principally in plain sawed Oak, quarter-sawed Oak, Red Birch, or Birch stained to imitate Cherry or Mahogany.

Our price on the Mantels, as you will notice under the following cuts, includes everything complete as shown, and the woodwork finished ready to set up, excepting the thirty necessary fire brick. These can usually be bought at home for less than the freight would cost from Chicago, and it is not customary to ship the thirty fire brick with the Mantel unless specially requested in ordering.

An Oak Mantel can be treated Medium, Antique or Golden Oak, or finished in Oil Natural; or where sample of the room finish is sent us we can treat the Mantel accordingly.

Any of these designs can be furnished in Curly Birch at an advance of about 15 per cent; in Bird's-eye Maple at an advance of 30 per cent, or in white and gold at an advance of 30 per cent. For genuine solid Cherry, over and above the price of Birch finished to imitate Cherry, the advance cost is about 15 per cent. The Mantels are made with adjustable wall plates to fit chimney breast, from 4 feet 10 inches wide up to 5 feet 4 inches wide.

The enamel and embossed tiling, as shown in cuts on face and hearth, can be changed about and substituted in the different Mantels, and in most cases at the same prices quoted. There are different shades and tints of tiling, and, if left to us, we select those which harmonize best with the wood selected, or, if desired, would forward samples of tiling for your own selection.

A Mantel boxed for shipment weighs about 300 pounds. We box each shipment securely, and, as stated above, our price includes everything, as quoted, ready to put in place.

In ordering always give width of chimney breast, and the kind of wood and finish wanted.

All hearths sent 5 ft. long by 18 in. wide unless otherwise ordered.

Always mention whether Mantel is to be finished Antique, Natural or Golden Oak. Unless otherwise specified we will ship in Golden Oak.

JOHN A. GAUGER & COMPANY,

TWENTY-SECOND AND LAFLIN STS.,
CHICAGO, ILL., U. S. A.

OUTFITS

REGARDING OUTFITS — The following outfits can be furnished with Mantels mentioned in this book. In ordering, please specify which outfit is wanted.

Outfit "1" consists of: Fire-place—No. 1309, Open Gauger Grate with plated frame, 24½ inches wide, 30¼ inches high, 20-inch Berlin black basket and ash screen.

Facing–Best quality plain enameled tile.

Hearth—60x18 inches. Best quality plain enameled tile.

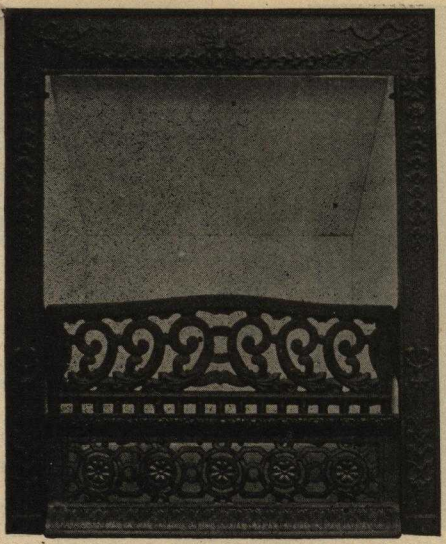
Extra charge if double draft damper is wanted with this outfit, $2.00.

The Gauger Grate which we show here is one of the most serviceable grates made. The basket is made of heavy iron, and the fire brick should be built to fit snugly up to basket. The basket is so made that it is very easy to poke out the ashes. For burning soft coal or wood these grates cannot be excelled.

Outfit "2" consists of: Fire-place—No. 1035, Plated Buckeye Grate, 24½ inches wide, 30¼ inches high, with 20-inch basket and plated summer front.

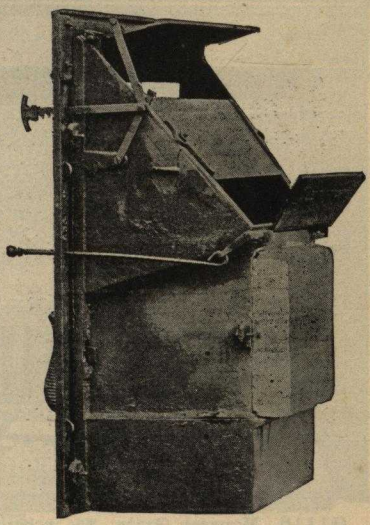
Facing–Best quality plain enameled tile.

Hearth 60x18 inches. Best quality plain enameled tile.



G1309 Open Gauger Grate

G1035 Buckeye Grate



Side view, showing damper arrangement.

The Buckeye Grate, which we show above, is 24½ inches wide, 30¼ inches high, 20-inch basket, and is without doubt one of the most beautiful grates of its kind ever produced. It has all of the desirable features of the Monarch Grate, having the same damper arrangement, and also a shaking bottom. The fire pot is lined in the back with fire clay lining, while the sides are of very heavy iron. These Grates being made all in one piece, like the Monarch, they do not require any labor or expense in setting. While they are not quite as heavy as the Monarch, still they will prove to be excellent heaters, and give perfect satisfaction.

You will save TIME and MONEY by ordering stock designs and sizes

G924 Gas Grate. 30½x30¼ and 24½x30¼; five row steel burner; deep or shallow back.

OUTFITS

Outfit "3" consists of: Fireplace—No. 924, complete mounted Gas Grate and summer front, copper plated; 24½ inches wide, 30¼ inches high. This grate has copper reflecting sides and base; made with five row steel burner; double hood; damper full width of back; operated by handle on top of grate. Has double ventilating back, which takes cold and foul air from the floor and passes through opening in back of chimney.

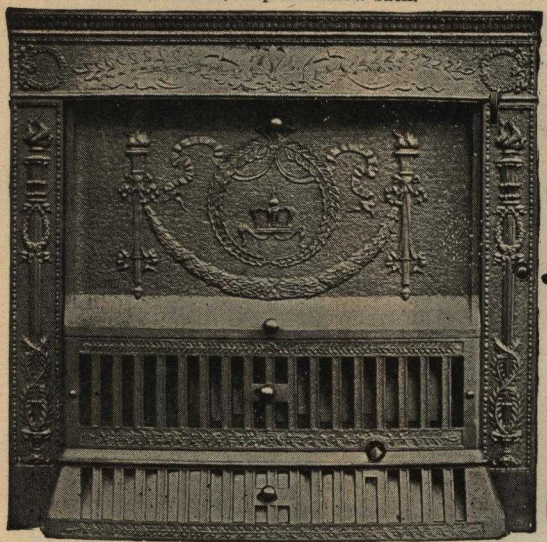
Facing—Best quality plain enameled tile.

Hearth—60x21 inches. Best quality plain enameled tile.

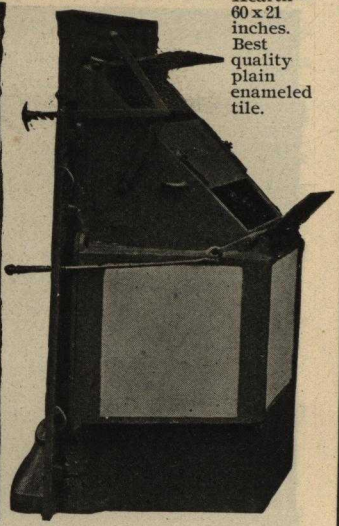
In ordering this outfit state whether natural or artificial gas will be used.

Outfit "4" consists of: Fireplace—No. 1116, Plated Monarch Grate; 30½ inches wide, 30¼ inches high, with 24-inch basket and plated summer front.

Facing—Best quality plain enameled tile.



G1116. Monarch Grate. 30½ inches wide, 30¼ inches high; 24-inch basket, 12 inches deep.



Hearth—60 x 21 inches. Best quality plain enameled tile.

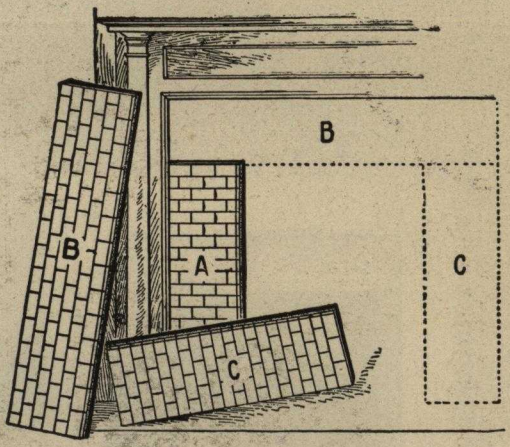
Side view, showing damper arrangement.

We recommend Monarch Mounted Grates to those who desire the comforts of a furnace and the cheer of an open fire-place. They are made like a stove, complete, all in one piece, and do not require the services of a skilled mason to set them, as all that is necessary is to push them into the fire-place, and they are ready for use. The fire pot in the Monarch Grate is lined with heavy fire clay lining that will not burn out, and also has latest improved shaking bottom. These grates are supplied with double dampers, which are operated from the front with knobs (see illustration). The lower damper is immediately over the fire, and in opening same you heat the flue, forming a current that carries off the dense smoke.

You will save TIME and MONEY by ordering stock designs and sizes

A NEW IDEA

MOUNTING TILE IN SLABS



The fact that you cannot procure the services of a skilled mason to set the tiles need not deter you from buying a tiled mantel. Our method of mounting tile on slate provides for this contingency and obviates the need of a mason, makes the setting up of a tiled mantel almost as easy as the erection of a bedstead. This is not an experiment. Its practicability is attested by hundreds who have purchased these mantels.

The most flattering testimonial is that some dealers have copied above idea, even going so far as to copy the description verbatim. When wanting the **best,** consult the **experts and originators,** not the imitators and followers.

The accompanying illustration shows our tiling mounted on slabs of slate, as we send it out for erecting. **A** represents a section in position; **B** and **C** similar sections, to occupy the blank spaces so marked.

Any tile work sent out by us failing to give satisfaction may be returned at our expense.

When furnished mounted in this manner tiling can be easily set in position by an ordinary mechanic, and at the same time it gives a job so thoroughly excellent and durable, as to constitute its additional cost an eminently wise investment.

DIRECTIONS FOR LAYING TILES AND SETTING MANTELS

We give below a few suggestions which will assist our trade to properly lay tiles and set mantels.

A solid foundation on which to lay tiles is the first consideration—the foundation or bed for tile on floor should be of concrete; one part Portland cement and three parts sand. Be careful that the floor on which the concrete foundation and tiles are intended to be laid is substantial enough to carry the weight. Lay out temporarily a part of the tiles, using sketch of pattern which you find in box with tile. Do not try to cover a larger space than shown on diagram.

For imbedding tiles use one part of good Portland cement to two parts of clean sand, and always soak the tile in clean water, say ten minutes before using them. Allow tiles to thoroughly dry out, then fasten up the mantel.

When possible have chimney 5 feet wide, fire place 26 inches wide by 30 inches high, and 10 to 12 inches deep, and the space for concrete under hearth 4 or 5 inehes deep.

166 pieces, 6 inches wide, in each bundle.
200 " 5 " " " "
250 " 4 " " " "

The above packing is full count or equal to 1,000 pieces 4 inch shingles to 4 bundles.

Write for prices on our "Special" Dressed Shingles ⅝ inch thick at butt, 4 or 6 inches wide, 20, 24 and 26 inches long.

Something New. We are prepared to furnish Stained Shingles, any color desired. Our Stained Shingles are uniform as to color, are stained full length, using absolutely pure stains; cost less and save the annoyance, etc., attending the dipping of shingles at the building. We recommend our Dressed Shingles for staining, but can furnish the ordinary sawed Pine or Cedar Shingles, if desired.

JOHN·A·GAUGER·&·CO
CHICAGO.

THE CELEBRATED "OLD DOMINION" PREPARED ROOFING

Two or Three-ply. Durable as Iron. Cheaper than Shingles.

Comes in rolls 32 inches wide; 100 square feet to the roll.

This material is very strong, pliable, compact, durable, quickly applied, and gives universal satisfaction.

It is composed of three sheets carefully saturated wool felt for the 3-ply, and two sheets of the same material for the 2-ply. Between each sheet of felt is a layer of waterproof, insoluble Cement, put together under heavy pressure, making a strong flexible sheet which, when coated and sanded, is practically fire and decay proof.

Each roll marked plainly.

Directions how to lay.

Easily put on.

Will outlast iron or wood.

To Cover 100 Square Feet Roofing.

1 Roll Roofing Fabric.
2 Gallons Coating (two coats.)
1 pound Roofing Nails.
1½ pounds Roofing Caps.

"MICHIGAN" SOLID ASH REFRIGERATOR

LIST PRICES

These well-known refrigerators have a perfect circulation, low temperature and are economical in the use of ice. The perfect insulation of the wall, with mineral wool felt, charcoal sheathing, and by using a tongued grooved lumber for inside walls, secure a dead air space which is acknowledged, when properly insulated, to be the best non-conductor known. The locks on the doors have a patent adjusting appliance which enables one to easily remedy any wearing which in time might occur, thus always securing a perfectly tight-fitting door, which is very important. The locks and hinges are solid brass and the most durable that can be furnished. All work is finished with best filler to bring out the natural grain of the wood, and best shellac and varnish.

	Length	Depth	Height	Ice capacity	Shipping wt.	Price
G102	26 inches	16½ inches	42 inches	50 pounds	110 pounds	$19.45

"MICHIGAN" SOLID ASH REFRIGERATOR

LIST PRICES

These refrigerators are lined with zinc, perfectly air and water tight, and have heavy metal shelves. The drain pipe is easily removed for cleaning and the trap is easily operated from the front of the refrigerator by a metal rod which dumps the water in drip pan before removing same, and automatically springs back to place, thus preventing dripping on the floor when drip pan is temporarily away.

	Length	Depth	Height	Ice capacity	Shipping wt.	Price
G116	38 inches	29½ inches	47 inches	110 pounds	220 pounds	$37.65

JOHN·A·GAUGER·&·CO
CHICAGO.

"MICHIGAN" SOLID ASH REFRIGERATOR

LIST PRICES

The "Michigan" has a handsome appearance, having hand-carved panels and an Antique finish; the construction is solid and durable, and our long experience has enabled us to put on the market a refrigerator which, for practical use, has no equal. Our Grocers' Special Refrigerators are not shown here on account of limited space, but will be pleased to send you a catalogue showing complete line, on application. **All refrigerator manufacturers give extreme outside measurements including castors. Ice capacity is obtained from number of cubic inches in ice chamber.** Heavy metal ice racks, self retaining, spring steel castors, and swinging base-board, thus allowing use of large drip pan, are also features.

	Length	Depth	Height	Ice capacity	Shipping wt.	Price
G121	40 inches	24 inches	52 inches	170 pounds	290 pounds	$51.60

WIRE GLASS

Now in extensive use for warehouse windows, skylights of train sheds and for general skylight purposes, lights in elevator shafts, partitions, office and jail lights, windows of machine shops and round-houses, cellar and bulkhead windows, store doors, store sash, etc.

Having a fine wire imbedded midway between its surfaces, the glass will not drop out when, by any accident, it becomes cracked.

Wire Glass requires no netting as protection from falling fragments. It may crack but cannot fall down, and need not necessarily be replaced.

It is also practically fire-proof, burglar-proof and stone-proof, and withal is easier cleaned than when netting is used.

We would be glad to quote you prices on sash glazed with wire glass.

2¼ to 2½ "	12.00	14.40	15.90	19.65	21.00	22.05	22.50	37.50

A pair of hinges consists of one spring hinge and one blank, and is strong enough for all ordinary inside doors.

G4168 to G4171

Matchless Ball-Bearing, Floor Spring Hinge— Double Acting

For Banks, Churches, Public Buildings, Vestibule, Butler's Pantry and Outside Doors.

The ball-bearing cups are made of best tool steel, oil tempered. The pintle, which the socket rests on, is made from steel shafting and rests direct on the ball-bearing cups, thus making it the strongest, most durable, noiseless and easiest operating hinge for any door.

Their ball-bearing insures minimum of friction, operates easily and without noise.

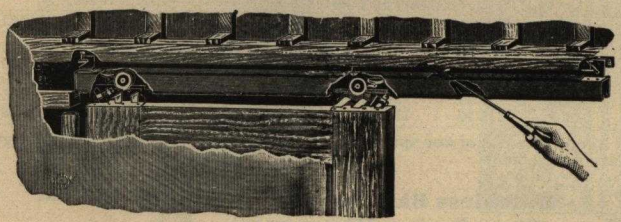
Trolley Hangers

LIST PRICES



G4177 to G4186

Made entirely of steel, with noiseless fibre wheels, running on a double set of best ball-bearings, run true and are held in place by a guide roller. The best trolley hanger made. Mechanically perfect and simple. Absolute straight track, perfectly rigid and simply and easily adjusted.

No taking down of doors or casings is necessary, as in the older makes of trolley hangers. All is done by a simple method from the opening of doors. This means no boxing of track is required.

Hanger consists of:

For Single Doors

One piece track, complete, two hangers and one floor guide.

For Double Doors

Two pieces track, complete, four hangers, one center stop and two floor guides.

ALL PACKED COMPLETE

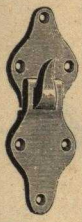
Schroeder's Patent Locking and Non-Rattling Hangers and Fasteners

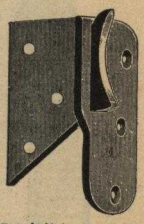
For Storm Sash and Screens



Visible Hanger

Fastener, 10 inches long

The Hangers are made from steel, japanned, and are light and strong. The Fasteners are made from steel and are 10 inches long.



Invisible Hanger

Ideal Ventilation and Solid Comfort

The Housewife's joy for clean windows. No more labor, expense and trouble. Easily and quickly hung or removed at any time by any person. All you have to do is to hook and unhook. No ladder, nails, screws or tools of any kind needed. Positively no screen or storm sash perfect without these new improved devices.

Visible Hangers, complete with screws, per dozen	$2.70
Invisible " " " " "	2.70
Fasteners, complete with screws, per dozen	3.60
Visible Hangers and Fasteners complete, per dozen	6.30
Invisible " " " " "	6.30

In ordering, be sure and state if Visible or Invisible Hangers are wanted, also if the Fastener is required.

Sash Cord

Braided white cotton, 100 feet in a hank, per lb.	$0.52
Cable laid Russian hemp, 75 feet in a hank, per lb.	.42
" " Italian " 75 " " " "	.52
" " India " 75 " " " "	.36

Iron Sash Weights

We bill out Sash Weights at lowest market rates.

Lead Sash Weights

Solid, compact, Noiseless

These weights are made under hydraulic pressure, securing greater solidity and density of metal and a smoothness of finish not found in ordinary cast lead weights. They are twice as heavy as iron weights, and consequently save one-half the space, which is a great consideration in many cases. The linked weights are very convenient for placing in and removing from pockets with small openings, the means of linking rendering them convenient for handling and shipping. Any size or shape made to order. Prices are no higher than ordinary cast lead weights. Write for prices.

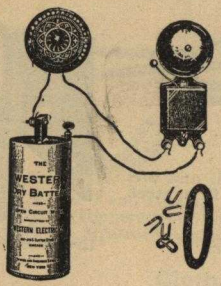
LIST PRICES

Electric Bell Set



G4451

G4451. Consists of one 2½ inch bell, one dry battery, one wood push button, 75 feet insulated wire and staples, all complete, ... $2.10

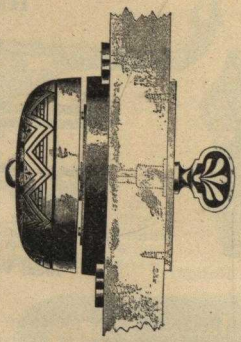
Rotary Stroke Door Bells

Always ready. Requires no winding. No springs to break.

G4452. Bell 3½ inch, amber bronzed, each $0.84

G4453. Bell 3½ inch, bronze plated, each $1.05

Rotary Stroke Door Bells

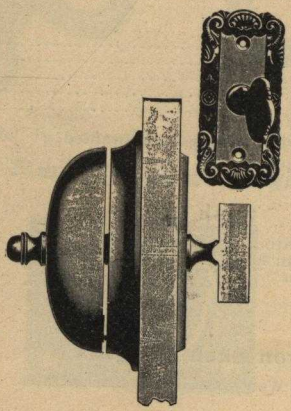


G4452 and G4453

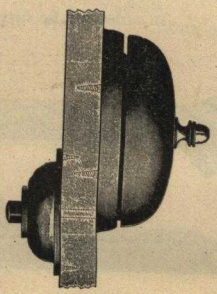
Electric-Ring Door Bells

No battery, self-winding, rings as you push the button, or as you rotate the bell turn.

This electric-ring bell gives the sound of a powerful electric bell and responds instantly when the pressure is applied to the push button, or to the slightest movement of the turn either way. No battery is needed. It is self-acting, self-winding, and as it is always ready for use, it requires no attention after it is set in place. It will not get out of order.



G4454.



G4455 and G4456

G4454. 3½ inch nickel plated bell, bronze metal turn, old copper finish, each $1.95
G4455. 3½ " " " " " " " button, each 2.40
G4456. 3½ " " " " " " " button, old copper finish, each 2.64

Column Irons or Porch Supports

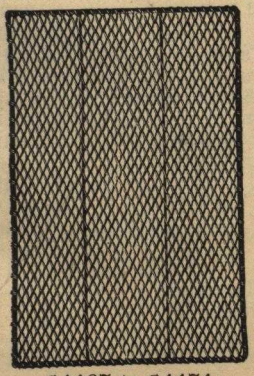
G4466

G4466. Cast, japanned, each $0.18



G4467 to G4474

Wire Door Mats

Our wire mats are made from galvanized steel wire of a temper adapted to this use, which gives it a durable and elastic surface. They have a rigid frame which makes them lie flat on the floor and prevents curling. Both surfaces are alike, making them reversible and always "right side up."

G4467.	16x24	inches (no center brace), each	$1.80

CONSIDER THIS

Your factory may be perfectly constructed, thoroughly equipped and ably managed, but unless judiciously located perfect construction, equipment and management will not enable you to earn dividends. We are glad to report on available and favorable locations open to all classes of industries on the lines of the Atchison, Topeka & Santa Fe Railway System in Illinois, Missouri, Kansas, Oklahoma, Indian Territory, Texas, Colorado, New Mexico, Arizona and California.

WESLEY MERRITT,
Industrial Commissioner,
Atchison, Topeka & Santa Fe Railway System, Chicago.
